

EDUCATION

The construction of contemporary educational facilities can be complicated and influenced by many factors. Buildings must be structurally sound and able to accommodate the rigors of use by students and faculty on a consistent, sometimes year-round basis. From new facility construction to retrofitting existing resources, Neal Electric guarantees quality work on all our educational building installations.

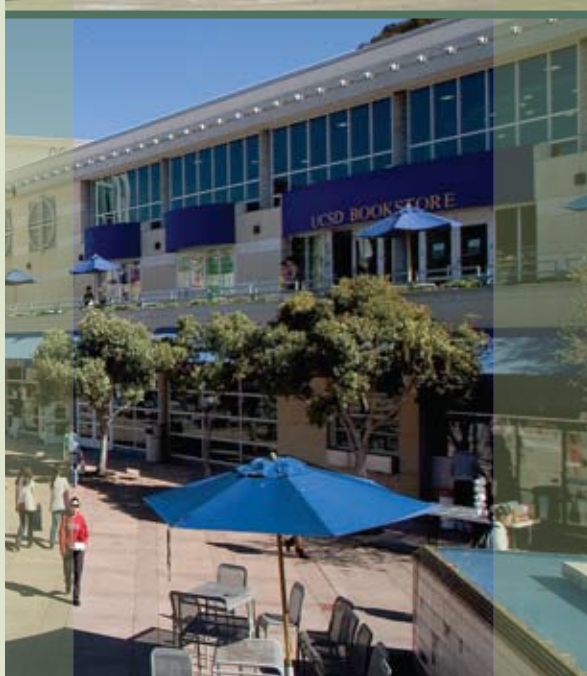

CORE CAPABILITIES

Addressing the Needs of Diverse Facilities

- Our scope of educational work includes K-12 schools, colleges, universities, associated facilities, and secondary school buildings
- We upgrade current structures and enhance existing programs, as well as create new multistory, multiple-building campuses from the ground up
- Collaboration with each individual school district is key—we value specific needs, including budgetary restraints and time and space requirements

In Touch With Technology

- Neal Electric is familiar with and utilizes new developments in technology to provide state-of-the-art installations
- Our experts can provide cutting-edge video, audio, and information-disseminating systems and laboratory configurations to provide a better educational experience for students
- Experienced, proactive preplanning and prefabrication departments perform installations to perfection with minimal impact on existing school schedules

EDUCATION COUNTS:

- CSUSM Craven Hall
- CSUSM Server Room Upgrades
- Cuyamaca College Student Center
- Los Angeles Southwest College
- Miramar College Tech Center
- Bonsall Elementary School
- Cesar Chavez Middle School
