

Regulations and requirements for medical facilities are constantly in flux. To keep current, Neal Electric works diligently to maintain proper certifications and qualifications. We ensure that every job is up to code and pursuant to safety guidelines.

CORE CAPABILITIES

Quality Planning and Implementation

- We are OSHA-compliant and well educated on all safety policies required in the medical market
- Strategic preparation enables us to properly staff and plan for a smooth construction process
- Neal Electric personnel provide efficient service with little disruption to patients, staff, or operations
- Our highly skilled on-site crew is supported by accessible, effective office staff
- Working closely with our clients, we ensure that all work performed fulfills the desires of the end-users
- Open communication with all our building partners ensures maximum efficiency with minimal cost to the client
