

*Due in part to actions abroad, electrical needs of the United States military at home have changed appreciably in the past 10 years. Today's military installations often necessitate complex design-build capabilities—a Neal Electric area of expertise. Our experience and depth of knowledge in military applications give us a leading edge in the market: we consistently deliver an efficient end-product while minimizing time and cost for our customers.*

## CORE CAPABILITIES

### A Partner You Can Trust

- We maintain an unwavering commitment to military confidentiality
- Our decades-long relationship with the military has earned us ongoing security clearance
- Continuous work with the same groups allows us to develop consistent internal teams who are familiar with previous projects and knowledgeable about projects in progress
- Every Neal Electric team works closely with our clients from bid to turn-key, completing all necessary electrical work details
- Our professionals look beyond the proposed project scope to offer suggestions and alternate means to optimize product performance
