

PROJECT MANAGEMENT

Every successful electrical endeavor is the result of sound and efficient project management. At Neal Electric, our proactive and experienced project managers provide viable solutions and creative suggestions to benefit our clients and the end user. With our profound understanding of logistics, budgets, and goals, we strive to make every project a win-win proposition from start to finish.

CORE CAPABILITIES

Every Project Is In Good Hands

- Neal Electric project managers are well-versed and skilled in electrical construction management and have at least 10 years of electrical experience
- Our group of seasoned project managers competently handle a wide diversity of projects:
 - Design Build
 - Military
 - Schools
 - Commercial/T.I.
- Projects in specialty divisions such as industrial and low voltage are headed by expert managers in those disciplines
- Project managers are intimately familiar with the latest in project management tools such as Prolog, SureTrak, and AutoCad
- All project supervisors understand LEED requirements and support our dedicated LEED APs on staff
- Our experienced team of project engineers and contract administrators provide expert assistance to our team of project managers

- We strive to provide the best service—every project request receives prompt, personalized attention
- Daily communication allows information to be distributed to all responsible parties

Effective Project Management That Fits the Bill

Neal Electric project managers possess a depth of diverse experience that lends itself to providing innovative ideas and solutions for today's engineering and budgetary challenges:

- Fast Track Construction Projects
- Value Engineering
- Design Build/Design Assist
 - Commitment to budget
 - Work to achieve constructable engineered drawings
